Summary

UBC graduate with experience supporting end users, analyzing business workflows, and developing data-driven reports. Strong communicator with experience translating technical concepts into practical guidance for non-technical users. Skilled in Power BI, SQL, and stakeholder collaboration to support operational decision-making and system improvement.

Education

BSc in Computer Science

University of British Columbia · 2020–2025

Skills

Analysis & Tools: Power BI, Tableau, Microsoft Excel

Programming: Python, SQL, JavaScript, R

Soft Skills: Communicating insights, technical writing, project collaboration, client support, problem-solving

Experience

Wireless Consultant —

— Summer of 2023

Staples

- Assisted customers with mobile plans (Bell, Virgin, Lucky) and provided support in the technology department
- Explained technical concepts in accessible terms to non-technical users
- Supported device setup and basic troubleshooting

Office Assistant —

— Summer of 2019

OCL industrial materials

- Supported day-to-day business operations through data entry, document organization, and administrative assistance
- Used Excel to organize and maintain product and operational information
- Assisted staff by responding to requests and ensuring information accuracy and accessibility

Frontend Developer —

— 2023-2024

Capstone

- Collaborated in a team environment to design, build, and support a React Native mobile food donation app for a client
 - Gained experience in project management, version control, and providing clear technical communication within the team
-

Projects

Portfolio: <https://n3c777.github.io/>

Solar Bench Project

- Supported and co-led a multi-department university club project
- Coordinated between design, hardware, and software teams, and assisting with workflow documentation for future iteration

Power BI Dashboard

- Created an interactive dashboard analyzing over 100,000 city service requests. Visualized trends, categories, geographic clusters, and response times to support operational efficiency and data-driven decision-making.

UK Sales Analysis

- Created a Tableau dashboard highlighting KPIs, trends, and product-level insights based on sales data.
- Prepared data with SQL and Python.

Help Desk Simulation Project

- Simulated IT support tickets in Zendesk using Windows VMs and Intune.
- Resolved issues such as password resets, account lockouts, software installs, and network connectivity.
- Authored knowledge base articles documenting step-by-step solutions for end users.
